LABORATORY KUTTIPPALA

Test Description	Value Observed	Reference Range
------------------	----------------	-----------------

DEPARTMENT OF CLINICAL BIOCHEMISTRY

HbA1C- Glycated Hb
[Nephelometry Method]

10.5%**Mean Blood Glucose : 255mg/dl**

Normal : < 5.7
Pre Diabetes : 5.7- 6.5
Diabetes : > 6.5

Good Control : < 6.5
Adequate Control : 6.5 - 7.5
Inadequate Control : 7.5 - 8.5
Poor Control : > 8.5

INTERPRETATION & NOTES

HbA1c reflects the average blood glucose over the previous 8 to 12 weeks and is not affected by short-term changes in diet.

INTERPRETATION

Below 5.7% Normal
5.7 - 6.4% Prediabetes
6.5% and above Diabetes mellitus

GOALS IN A KNOWN DIABETIC

Below 7.0% Good control
7.0 - 8.0% Fair control — review treatment
Above 8.0% Poor control — action needed

The estimated average glucose reported alongside is derived from the HbA1c and is shown for comparison with the patient's home readings.

Results may read falsely low in haemolytic anaemia, recent blood loss or transfusion, and falsely high in iron deficiency anaemia. Clinical correlation is advised.
